**The 3rd INTERNATIONAL WORKSHOP ON
UI GREENMETRIC WORLD UNIVERSITY
RANKINGS**

“Global Campus Partnership for Sustainable Future”

Hosted by

A. Background

Since the last 7 years, UI GreenMetric has become one of the flagship programs of Universitas Indonesia that ranked universities throughout the world according to appointed indicators of campus environmental sustainability issues, such as setting and infrastructure, energy, waste management, water, transportation, and education. This ranking is one of the university's efforts in promoting sustainability in campuses and also in involving stakeholders in any kind of effort to create a sustainable environment.

UI GreenMetric has a strong commitment to become a global platform for university students in the world to become active players in addressing the environmental challenges facing the world today. With the principle of mutual cooperation and sharing experiences, UI GreenMetric aims to raise awareness of universities as agents of change for a better world. The ranking is conducted through an online questionnaire system in which each university provided data about sustainability indicators. The data then automatically processed into a ranking.

This program has been conducted since 2010, the participation of universities around the world continue to increase. In 2010, approximately nearly 100 universities from 35 countries participated in the UI GreenMetric. In 2012, the number increased to 215 universities. In 2015, 407 colleges participated in GreenMetric UI. In 2016, there was an increase from previous year's 108 universities with participation by 74 countries around the world. The increasing number shows that this program can grab the attention of many universities throughout the world.

During the ranking process, many universities performance in UI GreenMetric have progressed. In order to increase the performance of each university in UI GreenMetric, universities need to share their sustainability's achievement and current condition in a forum. The “515” best universities in UI GreenMetric are the best examples of how sustainability policies can be implemented in universities in some aspects such as setting and infrastructure, energy and climate change, waste and water management, transportation and also education. These universities can share information about the implementation of sustainability policies in each university.

B. Purpose

International Workshop on UI GreenMetric aims to:

1. Disseminate and evaluate the implementation of the UI GreenMetric Ranking in which 515 universities from 74 countries in the world have been participants.
2. Share information about sustainability to improve the campus by studying some best practices.
3. Provide an opportunity for universities that get top position in UI Greenmetric to explain their university's excellence in UI GreenMetric.
4. Provide an opportunity for cooperation in sustainability management in campuses.

C. Main Program

The symposium will be opened by the Rector of Bülent Ecevit University, Istanbul University, and University of Indonesia. Keynote speakers including the Minister of Ministry of Environment and Forestry of the Republic of Indonesia and Turkey. Workshop topics are based on UI GreenMetric Indicators, such as Setting and Infrastructure, Energy and Climate Change Policy, Waste, Water, Transportation, and Education

D. Targeted participants

The total of participants expected is 300. Universities are invited to be participants is based on the University's participation in the UI GreenMetric World University Rankings in 2016.
